

EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

B.TECH IN COMPUTER SCIENCE AND

ENGINEERING

Aug 2020

Vellore

SKILLS

TECHNICAL

Java, Spring Boot, Spring Framework, RESTful APIs, SQL, Microservices, Test Driven Development, Kafka, Flowable, Git, Jira, Design Patterns, SOLID Principles, Maven

SOFT

Problem Solving, Analytical Thinking, Communication, Adaptability, Continuous Learning, Critical Thinking, Teamwork

ONLINE PRESENCE

- Coding Ninja (level 7 (exp 12000+) | Grand Master League) :
naukri.com/code360/profile/arsrivastavaa
- LinkedIn: <https://www.linkedin.com/in/aryan-srivastava-99a4311b7/>
- Leetcode:

AWARDS & RECOGNITIONS

- India Performance Champion**, EPAM Systems
- Earned badges :
 - Fearless Problem Solver, EPAM Systems
 - Innovation Enabler, EPAM Systems

ORGANIZATIONS

YOUTH RED CROSS, VIT

Design Mentor

- Led a design team of 10 members, overseeing creative direction and output.
- Delivered talks at multiple social awareness events organized by the club.
- Created promotional materials, including posters for various events.
- Coordinated and accompanied volunteers for blood donation drives.

EXPERIENCE

EPAM SYSTEMS | JUNIOR SOFTWARE ENGINEER

May, 2024 – present | Remote

- India Performance Champion Awardee** for delivering high-impact solutions and exceeding performance expectations.
- Client Project Role: Fullstack Developer
- Objective: Deliver **optimization and cost reduction** for the CoreLogic Credit business unit via **Intelligent Automation and BPM solutions**.
- Developed and deployed full-stack features for the BPM platform, integrating front-end user interfaces with core back-end automation services.
- Contributed to the SW Development of production-grade applications that streamlined operations and supported the **Mortgages Servicing industry**.
- Collaborated with a 37-member global team to implement technical solutions that achieved targeted process efficiency gains.
- Developed deployed an authorization form feature, **cutting AHT by 72%**.
- Contributed to a web app connecting local producers to consumers.

RADISYS | INTERN

June 2023 – August 2023

- Learnt about 5G networks.
- Project- Fetching results from **JIRA** for each user and send it to particular user and the admin.

LET'SGROWMORE | WEB DEVELOPMENT INTERN

June 2022 – Jul 2022

- HTML, CSS, JS and React JS were used to complete the tasks assigned.(Frontend)

PROJECTS

QR ORDERING SYSTEM FOR RESTAURANTS AND BARS

- QR-Based POS System for RestaurantsDeveloped a QR code-based POS system using **Spring Boot and MySQL** for the backend, with a **React frontend**. Facilitates seamless cart service and order placement for customers, while enabling order and receipt management for admins, improving restaurant efficiency and customer experience.
- Tools Used: Java, Springboot, ReactJs

GENCHECK – AI CONTENT AUTHENTICITY DETECTOR

- Developed a multi-modal AI-generated content detector using a microservices architecture with **Spring Boot, React**, and **Python Flask**, designed to verify the authenticity of **text, image, and video** inputs.
- Integrated Hugging Face's **chatgpt-detector-roberta** model for text classification, implemented an image analyzer using PIL and NumPy, and built a video analyzer in Java using **OpenCV** for frame extraction.
- Created a central gateway API to manage inter-service communication and route frontend requests dynamically via configuration.
- Tools Used: Java, Spring Boot, Python, Flask, React, Hugging Face, OpenCV
